The Spanish Account of Victory of Gen. Castellanos

TURNS OUT TO BE A HOAX

THE GOVERNMENT OFFICIALS HERALDED THE CAPTURE AND DESTRUCTION OF ESPERANZA. THE CAPITAL OF THE INSUR-GENTS-IT IS NOW REVEALED THAT THERE IS NO SUCH TOWN IN CUBA, AND THAT THE CU-EAN REPUBLIC'S CAPITAL IS AT AGRAMONTE, AND THAT SPANISH TROOPS HAVE BEEN UNABLE TO GET ANYWHERE NEAR THE PLACE.

NEW YORK, Jan. 27 .- A dispatch to the Breald from Havana says:

The Spanish account of the victory of General Castellanos and the capture of the headquarters of the rebel government in the town of Esperanza is now proved to be a fabrication. There is no such town as Esperanza is now proved to be a fabrication. There is no such town as Esperanza near Cubitas. The name of the town founded and occupied as the capital by the rebel government is Agramonte. Spanish troops are unable to get near this place, being repulsed in the mountains and forced to retire with a heavy loss.

that the rebels are still besieging Holgule and that the garrison cannot possibly hold out without supplies and re-inforcements, General Pando finds it impossible to send these although he is making desperate efforts to do so.

General Pando's army is still along the bank of the Cauto river and strongly intrenched, but is unable to assume the aggressive. General Comez shows no signs of taking the field and conducting an active campaign. He states as his reason that he is short of cavalry and cannot operate successfully against the Spaniards who have plenty of horses. At this rate the war in the east can last for years.

In the western provinces, however, the troops keep pretty well on the move,

results.

Radicals here say General Blanco is playing his last card in his present visit to the eastern provinces, for the purpose, it is said, of attempting to induce Generals Rabi and Salvador Rios to lay down their arms. Both these men refused to surrender at the close of the last, war and the Cubans believe them incorruptible. Before leaving Havana on Monday General Blanco, it is known, drew from the treasury \$350,000.

WASHINGTON, Jan. 27 .- A decision

is expected soon by Mr. Hermann, the commissioner of the general land office, in what is known as the Archbishop Ireland case, involving title to a large tract of land in Minnesota on which there are a number of settlers. The case, it is said, presents some unusual features and some important questions of law mre involved. The commissioner decilnes to say what his decision will be. "Whether the commissioner decides for of against the archbishop," said a prominent official to-day, "the title of settlers of lands received from him will be protected. There may be a difference in the amounts which they will be required to pay for their lands as a result of the decision. The difference is between the \$1.25 per acre, which would be the price as government lands, and that which they arred to nay the arch commissioner of the general land office, be the price as government lands, and that which they agreed to pay the archishop, which I believe was \$4 per acre less ten per cent. on certain conditions."

ALL SAFELY LANDED.

CHICAGO, Jan. 27 .- A telegram received by the Lake Michigan and Lake ceived by the Lake Michigan and Lake Superior transportation owners of the steamer City of Duluth, which went ashore in a gale off St. Joseph, Michigan, last night, says that the passengers and crew of the steamer, numbering thirty allogether, were safely landed at 5 a.m. to-day. The tremendous sea running made it impossible for tugboats to get near the steamer, but the life saving crew finally succeeded in getting their rope to the boat and the

Avoid An Early Grave.

How often do we hear, that the avenue to an early grave was opened by neglecting a slight cough and cold. Profit by this truth, and provide yourself with Dr. Bull's Cough Syrup, which instantly cures all throat and lung affections. Mr. W. H. Mahoney, Lowell, Mass., writes: "I was taken sick with a bad cold. The doctors did not seem to help me, and everybody said I was getting consumption, when a relative recommended Dr. Bull's Cough Syrup. I got a bottle and it helped me, and after taking two bottles I was cured, to the surprise of everybody. I shall always recommend it to my friends, as I know it to be a sure cure." EXPERIMENT STATION WORK

WASHINGTON, Jan. 27,-The second number of "experiment station work," prepared under the direction of Director A. C. True, has been published by the agricultural department as a farmer's bulletin. It contains a great deal of information on topics of interest to the farmer, the most important of which, probably, is that relating to the value of common crops for forage and a discussion of the question whether farmers can mix their own fertilizers economically. On this latter subject the bulletin says the unanimous conclusion reached by the experiment stations which have given the closest attention to the subject is that it is entirely practicable and economical under certain conditions for farmers to buy the different fertilizing materials in the crude stock and mix them on the farm and they have made every effort to encourprepared under the direction of Directhey have made every effort to encour-age and assist them in the practice There is no doubt that ashes are a valuable fertilizer when used with proper care and discrimination, but there is considerable danger that they may be, and are at present, overestimated by farmers, and money is expended in many cases in the purchase of ashes which might be more economically used in buying other forms of fertilizer. Other subjects treated of in the bulletin are stock melons, starch and potatoes, orimson clover, geese for profit, cross-pollination, and a germ fertilizer. There is no doubt that ashes are a val

CATARRH OF THE STOMACH.

A Pleasant Simple, but Effectual Cure fo:

Catarrh of the stomach has long been considered the next thing to incurable. The usual symptoms are a full or bloating sensation after eating, accompanied sometimes with sour or wateryrisings, a formation of gases, causing pressure on the heart and lungs and diffecult breathing; headache, fickle appetite, nervousness and a general played out, languid feeling.

There is often a foul taste in the mouth, coated tongue, and if the interior of the stomach could be seen it would show a slimy, inflamed condition.

The cure for this common and obstinate trouble is found in a treatment which causes the food to be readily, thoroughly digested before it has a time to ferment and irritate the delicate mucous surfaces of the stomach.

cous surfaces of the stomach.

To secure a prompt and healthy digestion is the one necessary thing to do, and when normal digestion is secured the catarrhal condition will have disappeared.
According to Dr. Harlanson, the

safest and best treatment is to use af-ter each meal a tablet, composed of Diastase, Aseptic Pepsin, a little Nux, Golden Seal and fruit acids.

Distinse, Aseptic Pepsin, a little Nux, Golden Seal and fruit acids.

These tablets can now be found at all drug stores under the name of Stuart's Dyspepsia Tablets, and, not being a patent medicine, can be used with perfect safety and assurance that healthy appetite and thorough digestion will follow their regular use after meals.

Mr. N. J. Booher, of 2710 Dearborn Street, Chicago, Ill., writes: "Catarrh is a local condition resulting from a neglected cold in the head, whereby the lining membrane of the nose becomes inflamed and the poisonous discharge therefrom, passing backward into the throat, reaches the stomach, thus producing catarrh of the stomach Medical authorities prescribed for me three years for catarrh of stomach without cure, but to-day I am the happlest of men, after using only one box of Stuart's Dyspepsia Tablets. I cannot find appropriate words to express my good feeling.

I have found flesh, appetite and sound rest from their use.

Why Morgantown Rejoices

The Post noticed a big lot of mam moth boxes on the wharf Thursday, being carried onto the steamer Blaine for shipment to Pittsburgh, and upon in-qury learned that they were filled with blankets manufactured by the woolen mills at Morgantown (the Monongahela Textile Company). Twenty cases were billed to go down this week, and fit took half a dozen stout deck hands to carry each big box aboard the steam-

ted. The verdict simply excludes him from affiliation with the churches of this coast.

The ecclesiastical council of Chicago, which has accepted Dr. Brown into its fold, is the only body that can give the decree of expulsion, and it now lies with that organization to decide whether he shall be received back into the fold. Dr. Brown has announced his intention of appearing at Metropolitan hall on Sunday evening next, at which time and place he will make another confession—not to a select assemblage of pastors, but to any and all comers.

Dr. Brown said: "I said nothing to any of the Chicago friends after I had determined upon the course I have pursued, for the reason that I thought San Francisco the proper place for my acknowledgment. I have written to the Chicago association that if its members so desire I will, upon my return, say face to face what duty requires. I have no desire to escape any utterance or altuation which duty now requires.

"I have seen many of the friends whose support I accepted upon a false basis and I shall see others to make such amends as I can. Without exception they have received me with a kindness which was both surprising and gratifying and to my mind a very superior illustration of Christian charity.

"The members of Bay conference who were justly opposing me have overwhelmed me with invitations to their homes, some of which I have already availed myself of; others I shall avail myself of in the near future. I do not know how soon I shall return to Chicago; not until I have done what duty requires here."

it means to be conversant with the capabilities of the Little Conqueror. A nood example of this comes from Fourteenth street, Mrs. C. Munzemaier, a much respected resident, was found by our representative at her home. No. 165, and the following is the account in detail of her ease in her own words. Mrs. Munzemaier says:

"For several years I was troubled with a weakness of the kidneys and bladder. At first, not so bad of course, neither was it steady, but as time went on the attacks became much more severe and frequent until it seemed—as though I was never free from it. It is the same old story, severe pains through the small of the back just over the kidneys, a distressing and annoying urlnary weakness. My back would become so sore at times that I could scarcely get around to do my work, and were I to sit in one position for a time it would be very painful to straighten up. I tried different things, but did not get any better, when I was recommended to try Doan's Kidney Pills. I got a box at the Logan Drug Company, and began to use them. I never had anything act so quickly and satisfactorily. I took only a few doses when I felt decidedly better. In time my trouble disappeared and I feel stronger and better every way, I can recommend Doan's Kidney Pills as being everything that is claimed for them."

OUR SMALL ECONOMIES.

They Most Impress a French Visiting Engineer.

A French engineer who has been on a tour of inspection in the states was not impressed by the big things of the coun-"I shall report to my government," try. says he, "that the biggest things in America are the little things." French people are experts in domestic economy, and live comfortably by eaving what everage families in the states throw away. But Americans are, on the other hand, experts in industrial economy. They make money by saving wastage in business, and lose some of it by wastage in domestic economy. The attention paid to small details in big works is amazing to me; I have visited more establishments where I believe that the profits are made not in the manufacture proper, but in the saving of materials and labor by close attention to details that are with us unconsidered trilles. For example, I saw a little grindstone in operation at a big works automatically sharpening lathe and planer tools. This machine costs probably as much as a hundred of our ordinary, grindstones cost, but I see that R automatically grinds all the tools for 300 high-priced mechanics, and it only works a few hours each day. The skilled mechanics in our country frequently stop their regular work to grind their own tools, and then they do it imperfectly. In the states tools are all accurately ground to the best shape by the machine, so that ing what everage families in the states

they do more and better work on this account in a given time. I believe that that machine has brains—the brains of the inventor—and it has no doubt revolutionized work of this kind in American machine shops. This is but one case out of many that I have noted."

The visitor correctly defined a pecular characteristic of American invente genius, says "Invention." The great engineering undertakings, the immente manufacturing establishments, and the teviathan machinery are, of cours, most conspicuous and impressive; but these bog things are comparatively few in number, while the movel improvements in little things—usually clased as "Yankee notions"—are legion, and each one contributes its mite toward the general sum of prosperity of the business of the country.
